

HM2C-SU & HM2C-DU Manifolds

Hi-Force has recently added the HM2C-SU (2-way controlled manifold unit, suitable for single acting cylinders) and HM2C-DU (2-Way controlled manifold unit, suitable for double acting cylinders) to the range of controlled manifolds available.

4-way manifolds and the new 2-way manifold units are supplied with:

- Pressure gauges reading 0-700 Bar on the inner scale and 0-10000 PSI on the outer scale
- AGA1-25 angulated gauge block with user friendly angulated design
- Female couplers on the inlet and outlet ports
- A sturdy framework to support and protect the framework

Please also note that the HM2C-DU is an open manifold for return flow, again with female couplers on the inlet and outlet ports.

Further information on the new 2-way manifolds can be found within the Hi-Force catalogue pages, supplied with this product update. The new manifolds are available for supply allowing Hi-Force offices and distributors to begin offering the units to customers with immediate effect. For pricing information, please contact your regional office.
