

Pistol Grip Pneumatic Torque Multipliers

Hi-Force is pleased to announce the launch of the newly designed TWP pistol grip pneumatic torque multipliers and the TWP-OG pistol grip pneumatic torque multipliers with integrated offset gearbox.

The newly designed torque multipliers have been designed to replace the previously supplied PG, SP and PT ranges and offer a comparatively lightweight and compact design, (weighing approximately 50% of the previous design). Further benefits of the new design also include:

- Steel gearbox with a bright electro coating galvanized surface, offering even greater corrosion protection and reducing the importance of lubrication in the gear box
- Torque capacities of up to 6,000 NM (and 3,000NM for the TWP-OG models)
- Highly accurate and repeatable torque settings

Sales & marketing support available:

- Hi-Force catalogue pages for both the TWP and TWP-OG ranges
- A press release promoting the launch of both the TWP and TWP-OG ranges
- The Hi-Force website has been updated to include information on the TWP and TWP-OG ranges
- A suitable advert of other marketing material can be produced on request – please contact laura.thompson@hi-force.com or andrea.dsouza@hi-force.com for more information.

The TWP range of pistol grip pneumatic torque multipliers is available for supply allowing Hi-Force offices and distributors to begin promoting the range with immediate effect. For pricing information, please contact your regional Hi-Force office.
