

TECHNICAL DATA SHEET

SECUMAX RING KNIFE MDP NO. 307

Safety technology

Concealed blade – a maximum degree of safety

The SECUMAX RING KNIFE MDP blade is not an open one, but is hidden from people and goods. This provides you with the highest degree of safety from cut injuries and from damage to goods.

SMALL SAFETY KNIFE WITH CONCEALED BLADE, DESIGNED TO BE WORN ON YOUR FINGER.

Order No. 307.08

Small, but nevertheless detectable.

Work with a cutting tool and at the same time keep both hands free? Surely not possible you say. But it is! The SECUMAX RING KNIFE is worn on the top side of your finger. It can be used to cut film, yarn, thread and much much more. And if you drop it or lose it anytime, don't worry: it's made of a metal detectable plastic. Detectability minimises the risk of your safety knife landing in your production line.

Stainless steel blade

Even a cutting tool that is as small as the SECUMAX RING KNIFE is fitted with a stainless steel Solingen quality blade. As you can see, we not only want to convince you on a large scale, but in the details too.

Singularly good

The SECUMAX RING KNIFE is a disposable cutter. You cannot change its blade. It will also not get lost in the heat of the

moment. Both these factors contribute to your safety - and to that of your company.

Always suitable

Finally, a ring that will never be too small! That's because the plastic is so flexible that it adapts itself to the respective finger size. So, from the index finger to the ring finger, each one can take its turn.

Better protection of goods

You will only cut what you really want to cut with the moulded-in blade. Since the nose is squared off you can neither hurt yourself nor damage your goods with it.

SECURITY ADVICE

To ensure that you use your new MARTOR knife safely and most effectively, please read and note the following user-instructions. Please keep the written guide in a safe place so that you can access it at any time.

1. Usage advice: Please use the product carefully for described work only and not for any purposes other than those that are intended. Please take the correct handling and the proper use of the cutting tool into account in this regard.

2. Special application Instructions to avoid the danger of injuries: Only use cutting tools that are in perfect condition and have sharp, clean and undamaged blades. Employ the utmost care when handling the knives. **CAUTION: The blade is sharp and can result in serious and deep cuts. Therefore, never reach into the blade!** To reduce the danger of injuries, hold the hand that is being used to restrain and stabilise the cutting base in such a manner that the restraining hand or even other body parts are not endangered in the event that

the knife slips. Do not modify this product in any way. Modifications of any kind may impair product safety. **CAUTION:** The risk of injury caused by manipulation of this product is extremely high. When both cutting edges are no longer sharp, dispose of the knife as general waste.

3. Non-use of the knife: Store the knife in a secure place.

4. Care instructions: Always keep the knife clean and do not expose it to unnecessary humidity to safeguard a long service life.

CAUTION: No liability will be assumed for consequential losses. Subject to technical changes and errors! This knife does not belong in the hands of children!

ACCESSORIES

MDP TEST CARD SET NO. 9910

There are five cards with different plastic balls in the MDP TEST CARD SET – between 2.5 mm and 8 mm in size. You can reliably test the effectiveness of your metal detectors using the „visiting card“.
